PROFILE

Transitioning from a Business Management graduate at the University of Westminster in 2022, I initially ventured into an internship at a Private Bank in Liechtenstein, specializing in Asset and Project Management. While the experience was intriguing, I realized it wasn't my long-term passion. Motivated to make a career shift, I enrolled in the Le Wagon web development Bootcamp, where I honed skills in building full-stack web applications. Now, armed with a solid foundation in web development, I'm excited to combine my business management background with my newfound software engineering skills for impactful contributions to innovative tech projects.

WORK EXPERIENCE

Game Developer (UE5)   July 2024 - Current

Roarington AG

- Developing and optimizing Gameplay mechanics and features using Unreal Engine 5.
- Collaborating with designers, artists, and other developers to create immersive gaming experiences.
- Implementing high-performance, scalable code in C++ and Blueprints to support Gameplay and system functionalities.
- Troubleshooting and debugging to ensure smooth game performance across platforms.

Software Engineer Intern   Jan. 2024 - July 2024

Disney Research Studios

- Collaborated with a cross-functional team of software engineers to design, develop, and implement backend functionalities for a web application, ensuring optimal performance and scalability.
- Participated in code reviews and collaborated with team members to ensure code quality, adherence to coding standards, and effective knowledge transfer.
- Worked on feature enhancements and bug fixes, demonstrating a proactive approach to problem-solving and troubleshooting.
- Implemented and maintained unit tests using Cypress.io, contributing to the overall reliability and stability of the backend codebase.

Software Engineer Intern   Aug. 2023 - Dec. 2023

Lentii

- Developed and maintained software applications, contributing to the enhancement and stability of key projects.
- Participated in the full software development lifecycle, from design and coding to testing and deployment.
- Implemented code improvements and optimizations to enhance the performance and efficiency of existing applications.
- Engaged in continuous learning and professional development, staying up-to-date with industry trends and emerging technologies.
- Successfully delivered projects on time and within scope, showcasing strong time management and project prioritization abilities.
